

Example Stimulus Pictures

Example 1

You could show your class this photo and ask them to say what they see, what they think about it and what it makes them wonder. This should lead to a good question for a P4C inquiry. For example:

I see.....

.... a child handing another child a purse

I think.....

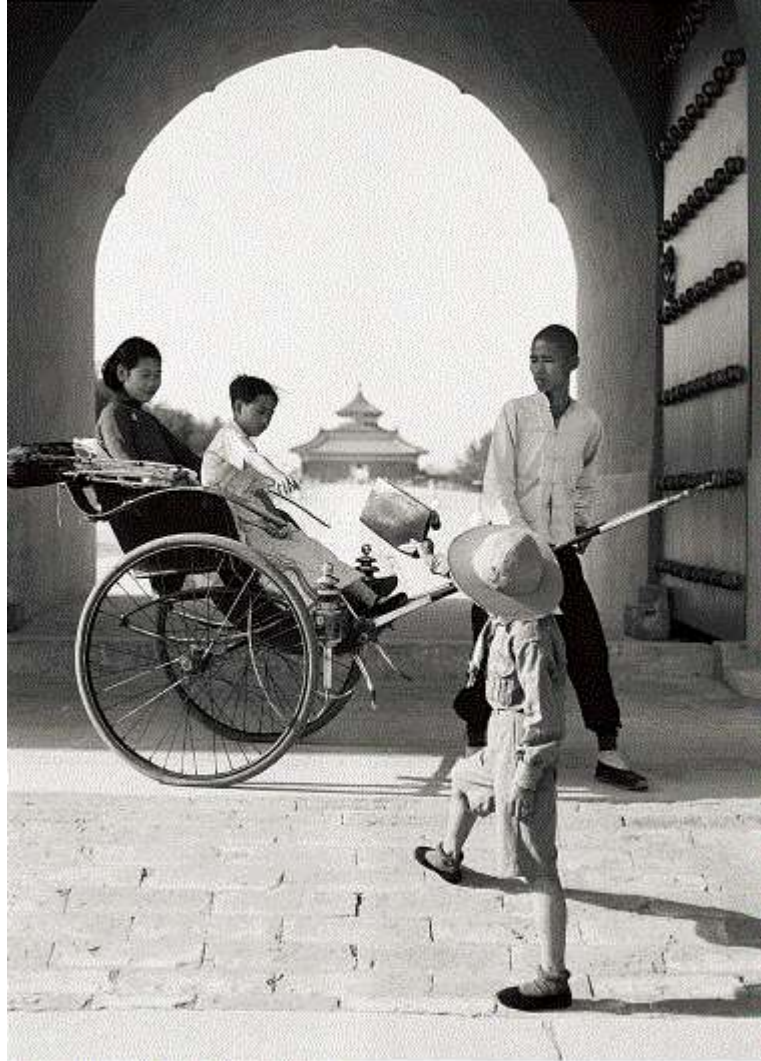

.....the child in the rickshaw is richer than the child on the pavement

I wonder.....

.....if it is fair that some people are richer than others

Example 2

You could show your class this photo and ask them to discuss in small groups what questions it makes them think of. They can then choose their best question and share it with the rest of the class. The whole class can then vote for which question they want to discuss in the inquiry.

Example questions might be:

- Why is the woman sitting in dirty flood water?
- Should you ask for help if you need it?
- Do people always have a choice about what they do?
